IBM Cloud Object Storage:

Buckets of Cloud:

The screenshot shows the IBM Cloud Object Storage interface. On the left is a dark sidebar with navigation links: Cloud Object Storage, Storage instances, Cloud Object Storage v4, **Buckets** (highlighted), Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main content area is titled 'Buckets' and includes a sub-header: 'Buckets serve as containers for objects, and can be individually configured in terms of their location, resiliency, billing rates, security, and object lifecycle rules.' Below this is a table with columns: Name, Public access, Location, Storage class, and Created. The table is currently empty. A large, light gray box with a cube icon and the text 'Buckets' is overlaid on the table, stating: 'Get started by creating a bucket to store unstructured data. A bucket is a container for your data.' The bottom of the screen shows a Windows taskbar with various application icons and a system clock indicating 10:21 on 10-11-2022.
